## WORK EXPERIENCE

### Software Engineer

*Freelance*

September 2021– Present

*New York, NY*

- Design, develop, and deploy websites that professionally represent businesses and serve their needs.
- Research and implement technologies that are best suited for the customer's vision and budget.
- Work closely with clients, understand their needs and communicate technical concepts.

### Catering Director/Business Development Manager

*Sticky's Finger Joint*

December 2019 – December 2020

*New York, NY*

- Supervised daily catering operations for 13 locations.
- Overhauled standard operating procedures at the store level and communication/reporting procedures for the corporate team.
- Developed new catering workflow systems, SOPs, and sales techniques, increasing the program's operating capacity and growing revenues by 25% in 6 months.
- Managed and trained new staff, while overseeing ordering, scheduling, and general operations for new store rollout.

### Catering Manager

*Just Salad*

September 2018 – December 2019

*New York, NY*

- Developed and implemented new company-wide standard operating procedures for a network of over 50 stores.
- Implemented new order management system and sales outreach strategy, leading to a substantial decrease in order refunds and over 50% growth in YoY sales

### Executive Chef

*Allium*

June 2017 – August 2018

*Waterbury, VT*

- Oversaw kitchen operations including hiring, training, ordering, costing and menu development.
- Reinvented menu offerings and rebranded the operation.

## PROJECTS

### Bug Tracker / Project Management App

Developed a full-stack project management app using React, Rails, ChartJS, and Material UI.

- Rails REST API stores data on a PostgreSQL database hosted on Heroku.
- Application allows users to create teams with other users, assign roles in projects, and assign/update discrete tickets.

### Financial Dashboard

Created a financial dashboard in React using 3rd party APIs, Semantic UI, and ChartJS.

- Built to allow users to save favorite stocks, add them to a portfolio, and view details on a dashboard.
- Deployed to Netlify with a JSON server for the backend.

## SKILLS

- **Technologies:** JavaScript – React – Ruby – Rails – Python – HTML – CSS – Git
- **Interests:** Cooking – Powerlifting – Personal Training – Cycling

## EDUCATION

### Flatiron School

*Software Engineering, Immersive*
